Wee are to note to you that where wee mention the coloured Bayes it is to be understood that every half p^t is to be accounted for a whole p^t & therefore let every p^t be cut into Two —
and further wheras you mention in yours of 9th July that you would send the Sayes & Shalloones that wee wanting of ye former parcel you must note that there was wanting Sayes & long Ells, & not Shalloon & therfore if you have alreadyy sent according as you write, you must send the whole complement of long Ells mentioned in this last parcel & leave out the Shalloones, but if you have found out your Mistake & sent the longe Ells which are wanting, you may then Send the Ten peeces of Shalloones & make up the long Ells, Sixty peeces as is mentioned in this last parcel — wee believe wee have explained this enough, only stil must enjoyne you to take Care of every thing that it may answare the Order, & well dyed as we now have said, & must always recomend unto you

you may send more these following Goods in halves as the Two aforegoing parcels let them be Marked NS
