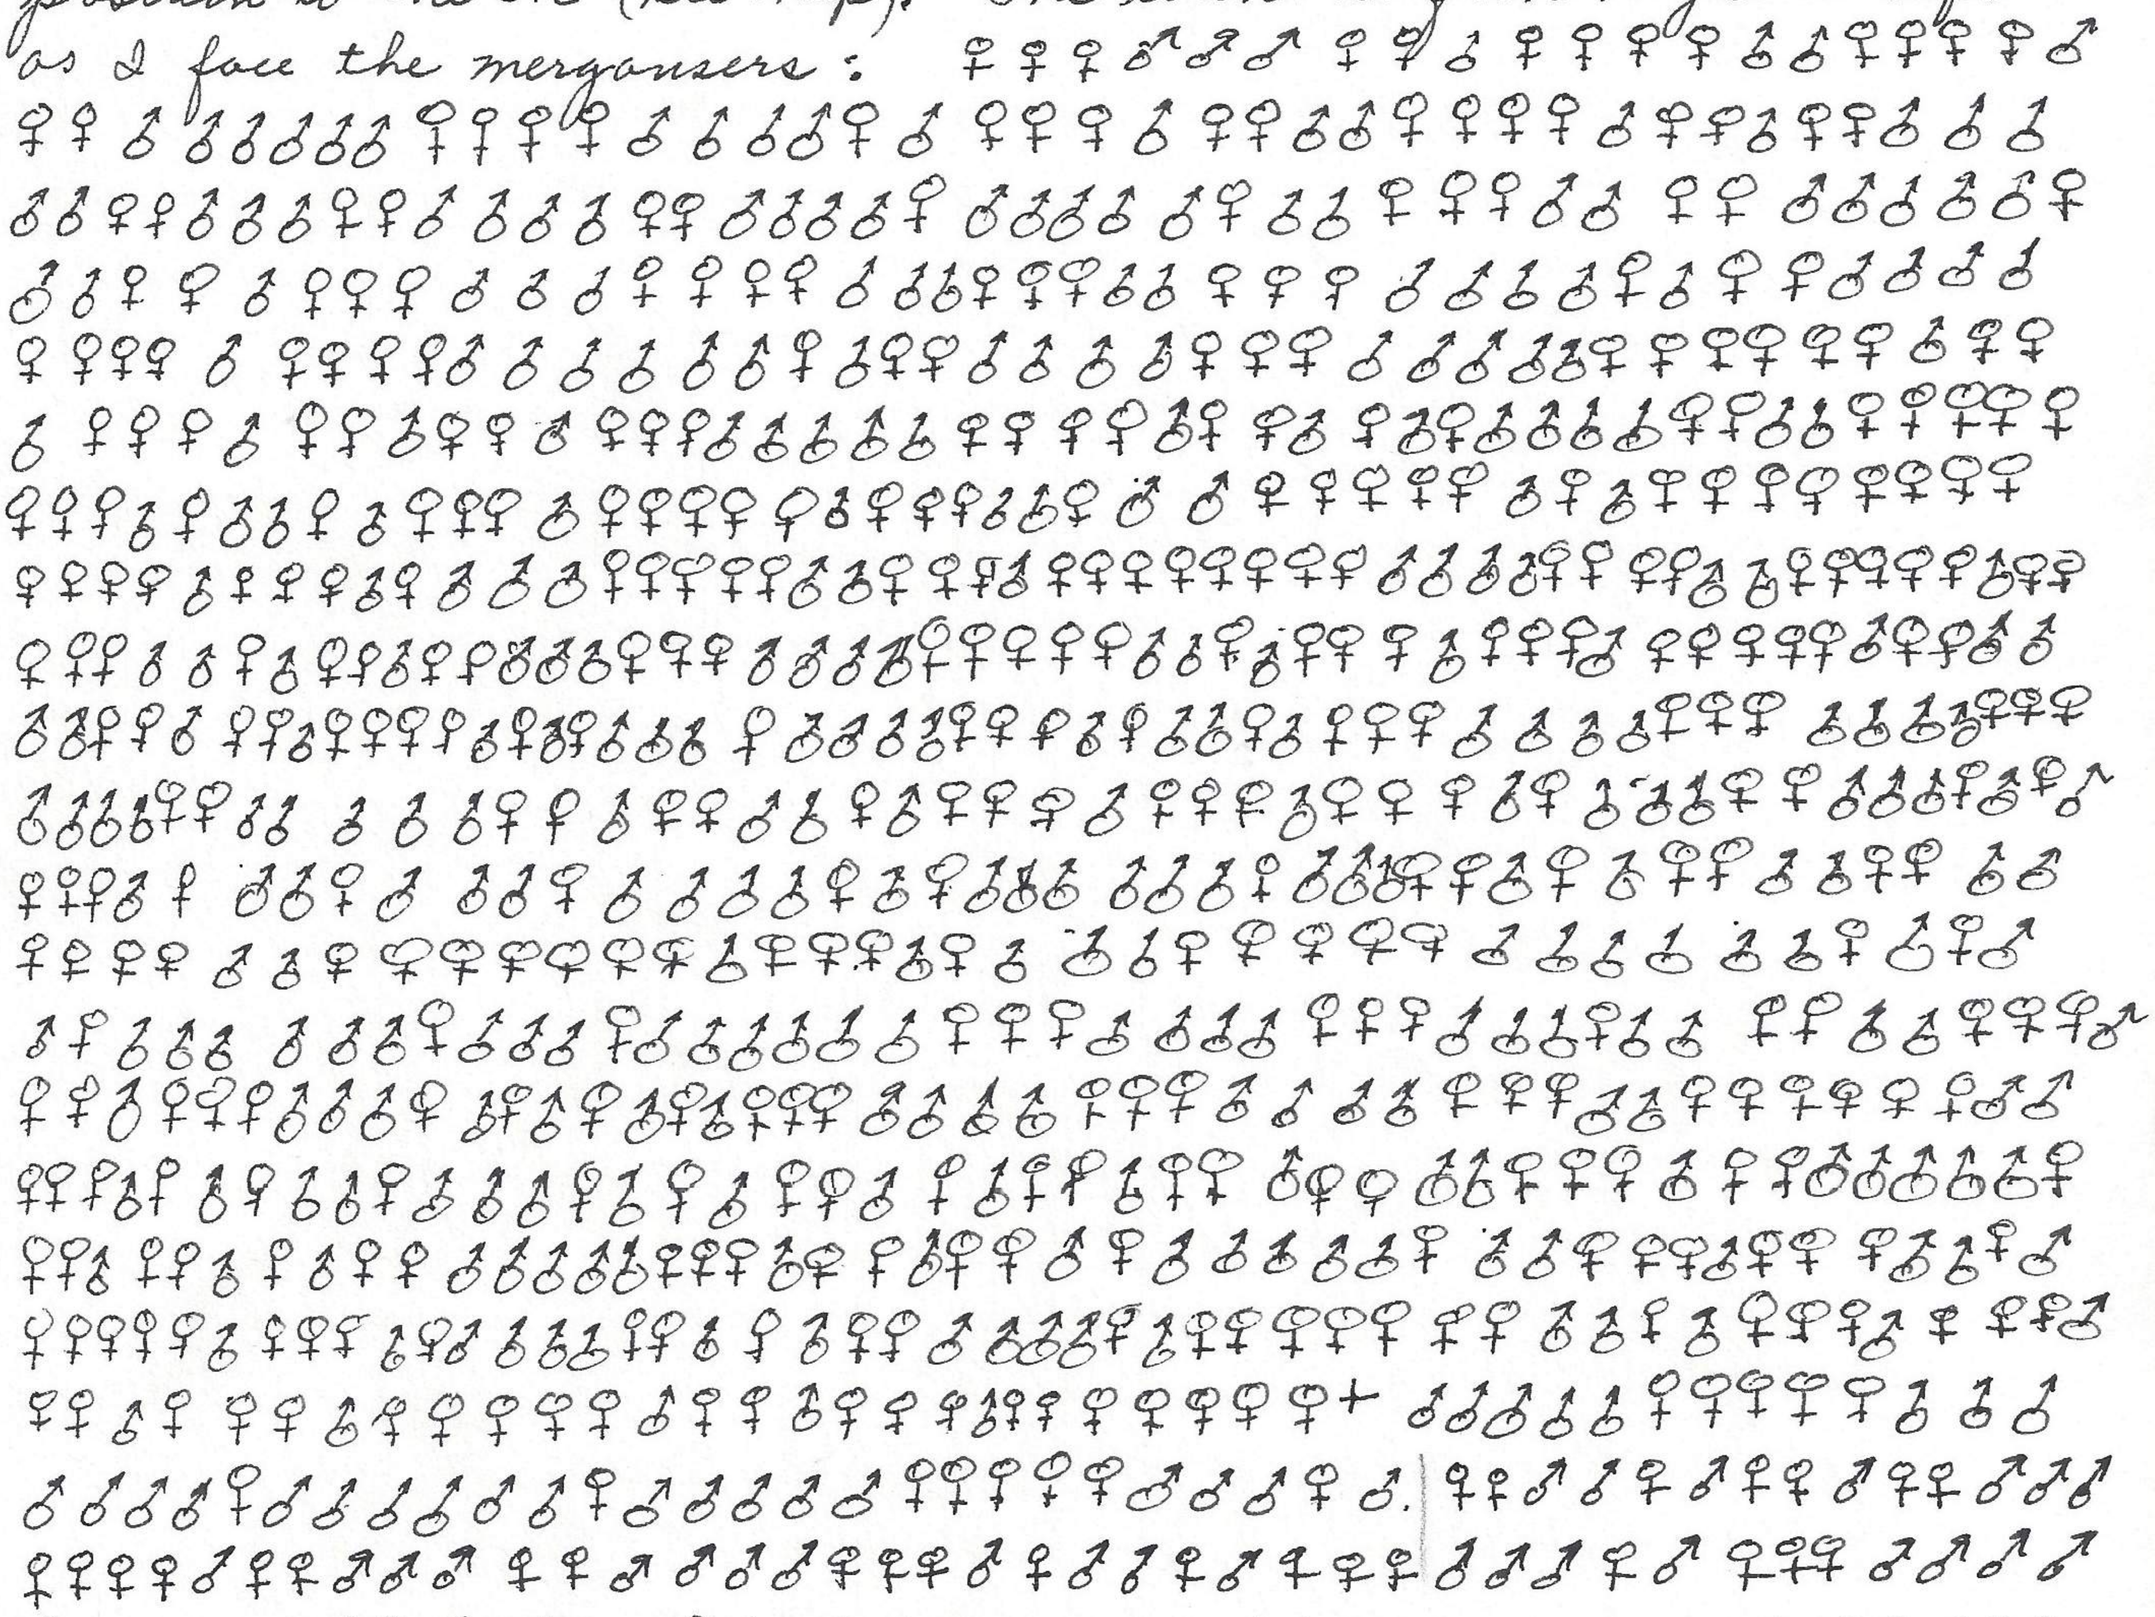
13.3 outlet gate. 14.1 W end of dam. In lake to N noted 1 group of 18 mallards and 1 group of 8 green-winged teal. No other birds in area of dam except to extreme N near Gop Point. Will check these at the appropriate observation on W side of reservoir. 14.0 flock of small birds in same area as observed on previous trip and consisting of 80 tree sparrows, 40 juncos, 5 chickadees, 12 cardinals, downy and 13 Harris sparrows. 15.7 4 bluejays. 16.0 paved road and turnoff to boat ramp. redtail Ice in bay by ramp. Did not go to ramp but continued N and at 16.2 stopped and established observation point from road position. Time 10:40 A.M. Will record according to sex and number the raft of American mergansers to the NE in their original position as they moved to a new position to the S.E (see map). The count is from right to left as I face the mergansers:



= 612 ♀
