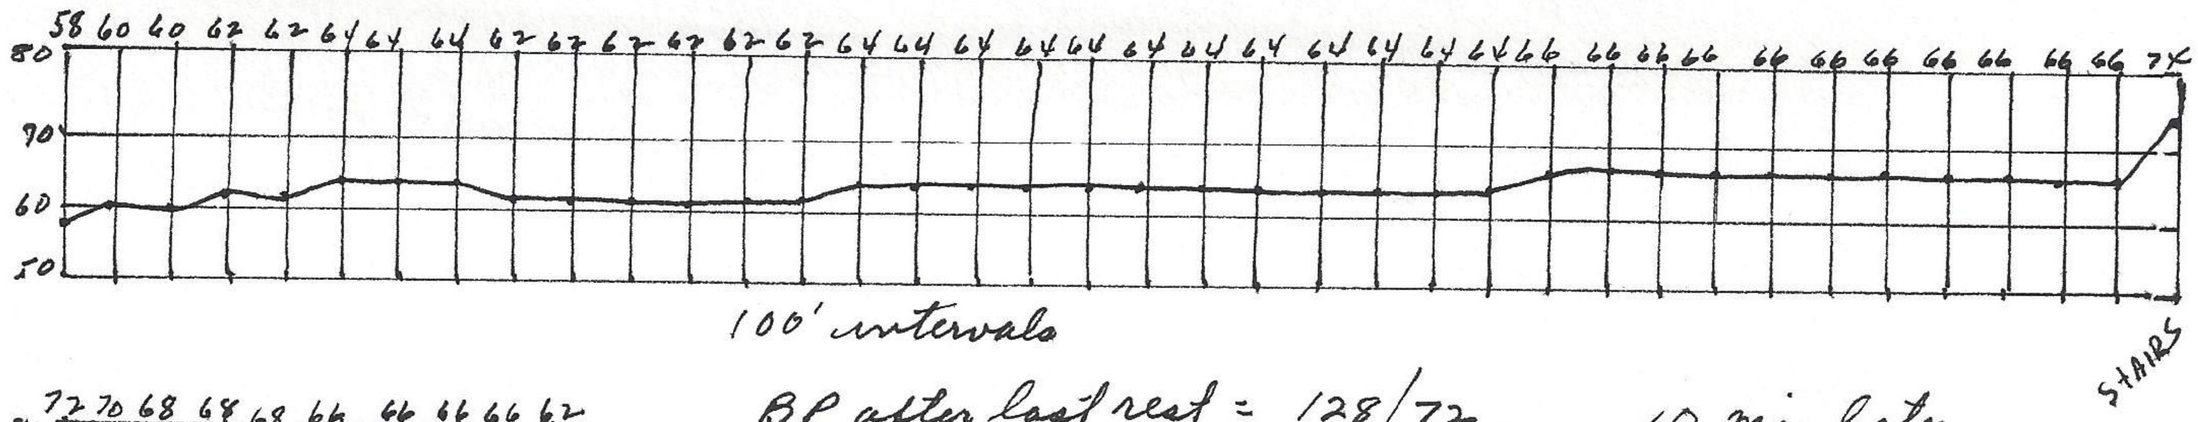
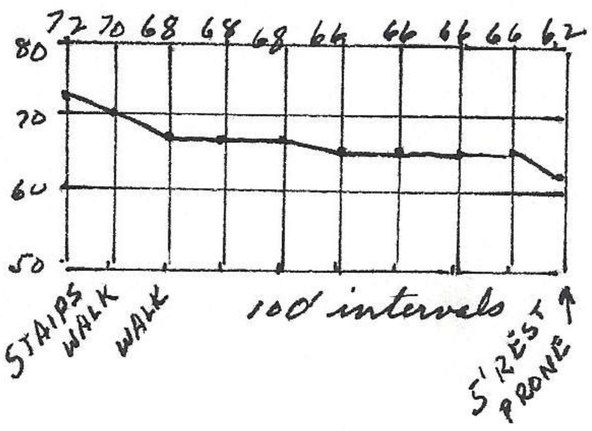
800909-2

Jan 9, 1980





BP after last rest = 128/72. 10 min later 58. 15' later 62. Early this morning at 4:00 A.M pulse increase then decreased to near last then to normal. B.P 7:50 A.M 154/90
40 mgm potassium (Koan cl) daily (twice)

Jan 10, 1980

To Cardiovascular Consultants, Inc. St. Luke's Hospital for monitor
~~Last~~ This night two minor pulse changes, same as usual but longer duration and latitudes not as extreme. Did not loose pulse. This variation has occurred in last two days. Some suggestion of irregularity of pulse on monitor but not consider significant.
20 mgm potassium.

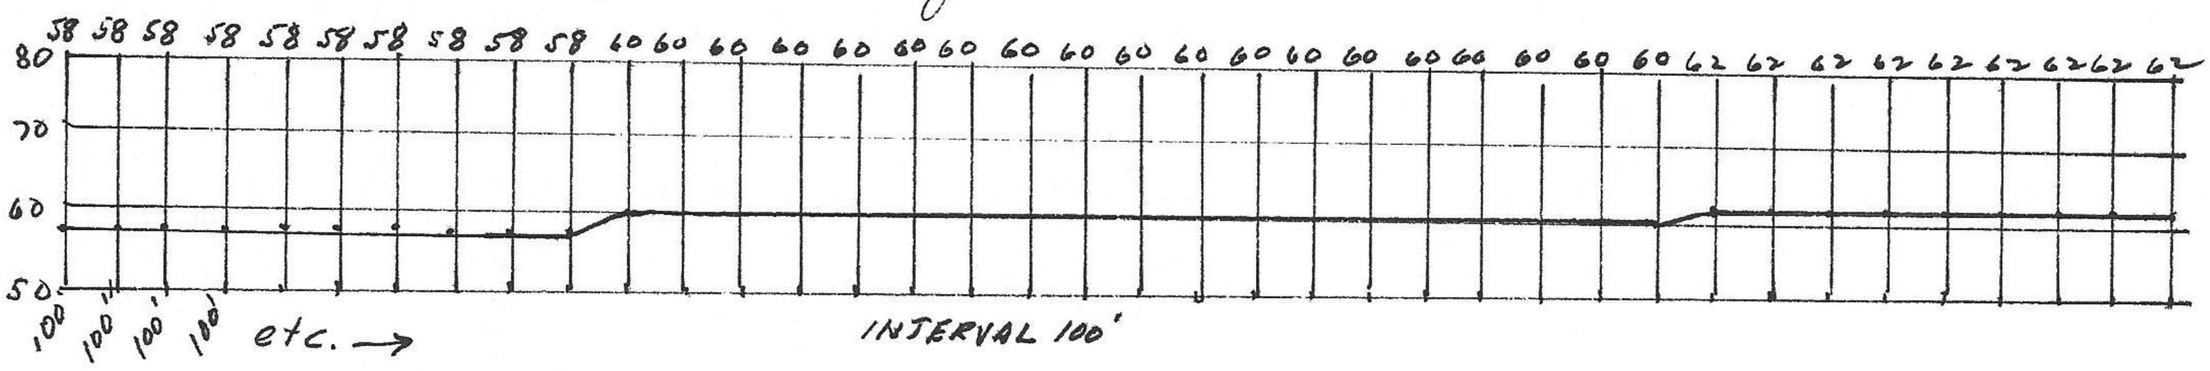
Jan 11, 1980

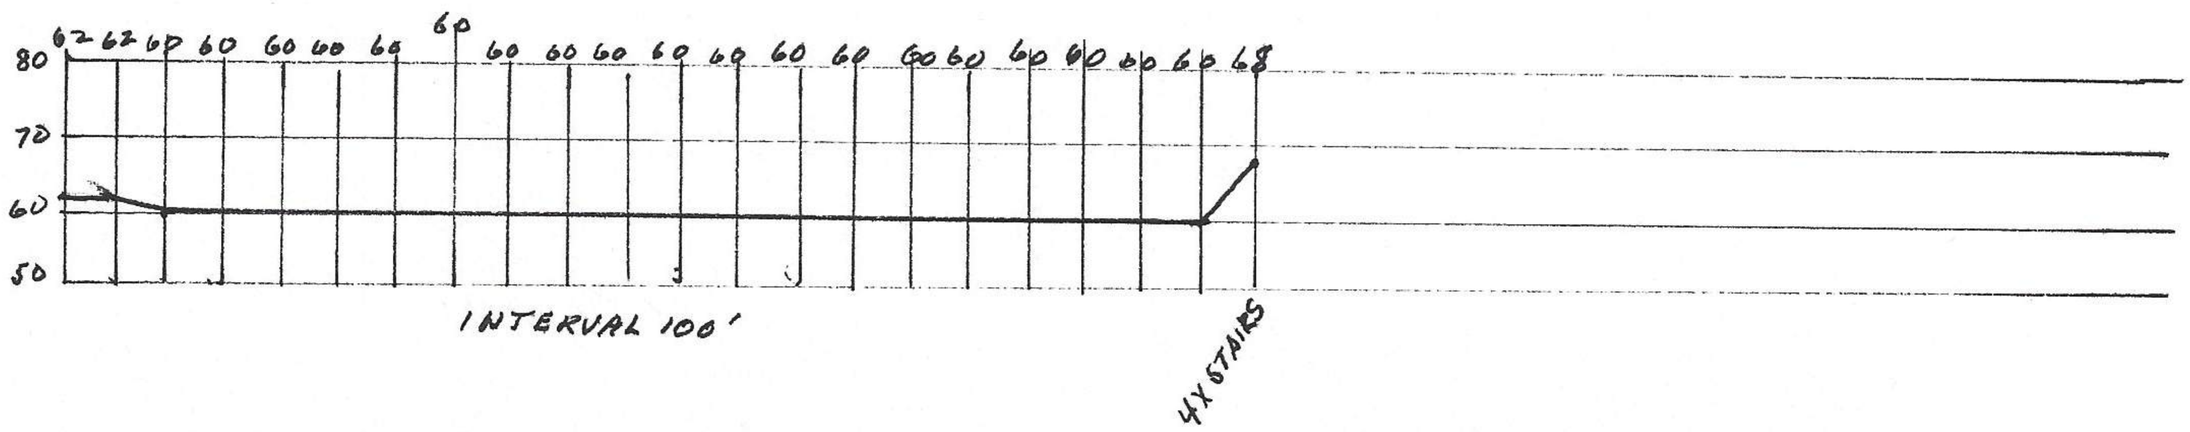
Returned monitor this afternoon. No irregularity tonight. Reduced 3 to 2 daily quinidex

Jan 12, 1980

Walked mile, pulse 58 at end. 6:30 P.M. B.P. 136/74. Last Quinidex 11:50 P.M.

Jan 13, 1980

Drove to Clinton Reservoir, open except bays in ice. 28 ring-billed gulls at boat ramp. 24 along dam. 8 mallards observed.




Walk 10:30 AM - 11:50 start pulse 56 Jan 14, 1980
