October 19, 1939.

Mr. C. G. Bayles, Supt.,
Buildings and Grounds,
University of Kansas.

Dear Mr. Bayles:

Fifteen to twenty cars are parked in the parking area back of the gymnasium every day in a very haphazard way. This parking ares is not in good condition for these cars, much of the space being on a downhill slope. If any of the cars should start rolling it might result in a disaster.

The entire parking space needs grading, filling in and leveling off. The driveway up the hill is rough and is cut with deep trenches caused by water running down through the road.

We appreciate all the fine things that you have done for us, and we do know how many things you have to do. We are confronted with a real problem, and would appreciate it if you would study the situation and help us out in any way you can.

Very sincerely yours,

Director of Physical Education and Recreation,
Varsity Basketball Coach.
