Prof Dyche.
Lawrence Kansas.

Dear Sir.

I killed this animal on the head waters of White River near Manvine Lake Colorado in 1888 - he was a monster - measuring fifteen feet and four inches from tip of antler to rear hoof and girted seven feet and three inches. carcass weighed from 12 to 1400 pounds. I have seen several hundred Elk and been at the death of "some" - but have yet to see a finer specimen - it is with pleasure I hand you this photo.

Yours Resp
Dall DeWeese
