December 26, 1942.

Mr. Kenneth Smith,
3038 Gillham Road,
Kansas City, Mo.

Dear Kenneth:

I am sending my set of golf clubs to you by express, and hope that you can refinish the shafts on them. The chromium has chipped off near the head, and rust has started. Dean Jakosky, of the Engineering School, used very fine sandpaper, I believe, on some of these to prevent further erosion, but the surface is still very rough.

You will notice also that there is much discoloration close to the head. I shall appreciate it if you will service these clubs for me and put them in tip-top shape.

Sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.
