I was informed that the Dr. was arrested at Lexington upon that most absurd and base charge of conniving at the assault upon Jones instead of High Treason as I had supposed

And next, while at Lecompton after that affair, I overheard a Pro Slavery man denouncing the whole town except myself for having a hand in it and said that it was not likely that I could be so intimate with Dr. Robinson and not know something about it

Putting all these facts together I have come to this conclusion that the hot pursuit after me, and leaving my daguerrotype, offering a reward &c which I could not account for before - has not so much for its object the getting me for a trial for High Treason as that perhaps they fancy that I may know something which would be to the point. If this is the ~~case~~ fact, my leaving at this time may prejudice your husbands case and it is that I may be fully informed that I write you -

I know no positive fact that could benefit him but if I was present at his trial or examination (if there ever is one which I doubt, if our friends at Washington stand up right) and showed them that I know on the other hand nothing to cast suspicion on him, it might be better -

Please write to him on this subject
