keep my notes & if you will let me know when you get here & where you will be or when you would like to see me Monday I'll be very glad to go over it all with you.

A few of my observations as to players in bring are as follows

One boy McDonald #56 always plays in the very corner on offense He shoots well from there & can make a quick dash in.

Williams #33 regular center or Jinkins his sub. always play the post just out side the free throw lines between back stops and free throw circle × other players pass in to them × They either pass back out or try to use their height & shoot × Dont get the idea there is more than one in there at the same time

Vire #67 a guard a big boy jumps center, fair shot good defensive man - on offense plays clear around on the far side of the horn away from McDonald ×

Hayes #61 a fairly burly red haired guard sometimes changes to forward on defense, pretty good shot from out a ways if not watched - Is the spark plug. Pops up the game - when out of game the heat seems to go off

Yours
