out of the water, I know he hath travelled
many Countries, speaks many languages,
hath seene many monsters and Customes,
and knowes much of forraigne Nations,
yet a little knowledge of the Common law
of this land would have beene better for
him then all those, It would have kept him
from asking of questions and bumbling
in standall of Religion and Justice, he
of the meane Yeilded of the Kingdome
and that in round blank Bradwine is above
Eloquence, the partie himselfe acknowled-
-ged that he dyed justly, and those that
saw him said that he dyed penitently,
so I conclude as it was somebynes said
of Como, Et quo tanta fuit Romam tibi
causa videndi, he might very well now
say of Dr. John Stollio his going to
Tyburne with a little alteration of
his word Et quo tanta fuit Tiburni
tibi causa videndi; for his Conscience he
agreed with that which had beene sett
and the acknowledgment of mr Lundsen
should bee also in the Courte of Common
pleas and Exchequer because the Justice
of all Courts may bee wronged with
scandalous petitions, and moved that
information might bee made against
the other ponds that were asking of
questions as those were, and that they
might receive their due punishment he
meant

meant he said mr. Sir Baile, Dr. Tho:
Vaughan, and Dr. Lord Dawe, who would bee
a Baron if Attainders did not lye in the
way; If those bee not punished, the ponds
will think that they have wrong, Sper-
que mala ru multis rationi loriora videntur
he said he would wish ponds to take heed
how they fall into distourbes of those busi-
-nesses when they bee at their Chambers
for in the proceeding of those great busi-
-nesses and affaires, if a man speake
extraordinarily of the Justice thereof, the
bird that hath wings will reveale it/.

Dr. Ralfe Rimwood said yt
it was well said by mr. Attorney, that
Justicia est Regina virtutum, and that
wisdome fortitude and temperance are
but pedissequa and ancillata unto her,
to the end that the glorie of Gods Justice
in this great business might bee the
more ascribed unto him, he would declare
the same from the beginning as it were
a bone not thereby to move and con-
templation therefore from your Lords (who
knowes the same well already) but for
the better satisfaction of other Lords
and ponds there about who do not so
well understand the same though it con-
-tained in a long speeche, yet att
length it was discovered by a voluntary
and free confession, for Dr. Gerbere
Elbach
