July 14, 1993

Took Bee Boat to Deer Harbor. 3.6 miles per hour at 11:00 P.M. On return to Lopez noted a female mule deer (ad) swimming across Upright Channel toward Orcas Island. It swam with head and ears only above water and toward half way point course become deviated. It was displaced at Upright Head by a dog.

It may or may not have reached the Orcas shore.

a bald eagle (ad.) capture prey or debris in middle Shoal Bay. Watched 3 peregrine falcons for at least 15 minutes ^{6:30 P.M.} on ridge E of Shoal Bay above the marina. They circled, made long dives down ridge, one at a great blue heron in flight, chased each other with bodily contact (the falcons), all just above the tops of Douglas fir on the ridge. They used one dead Douglas fir for perching between flights. No calls offered.

tail in circling

tail in forward flight
