

Nov 5, 1993

mule deer with 2 points each side and no eye lines still pursuing ♀♀'s with wrinkled nose, open mouth, head up.

The madrone tree in front (SE) Bee House used by birds and raccoons. Another tree 50' away still has original number of berries.

berries gone mainly by birds

20% gone and berries still red, eaten mainly by raccoons

Nov. 10, 1993

constitution of group (local) of mule deer.

3 ad over 3 years

1 ad 3 years

2 2 year old.

1 1 yr old.

2 this year

9

3 year old ♀ dominant but challenged by larger female.

Nov. 11, 1993

To Anacortes via ferry, all in fog. 7:50 A.M.

Nov. 12, 1993

6 common murrelets, all ♀, into Spring Cove and thence along shore SW Bee House. They travel fast and go for long distances.

Nov. 14, 1993

sunrise 7:26 A.M.

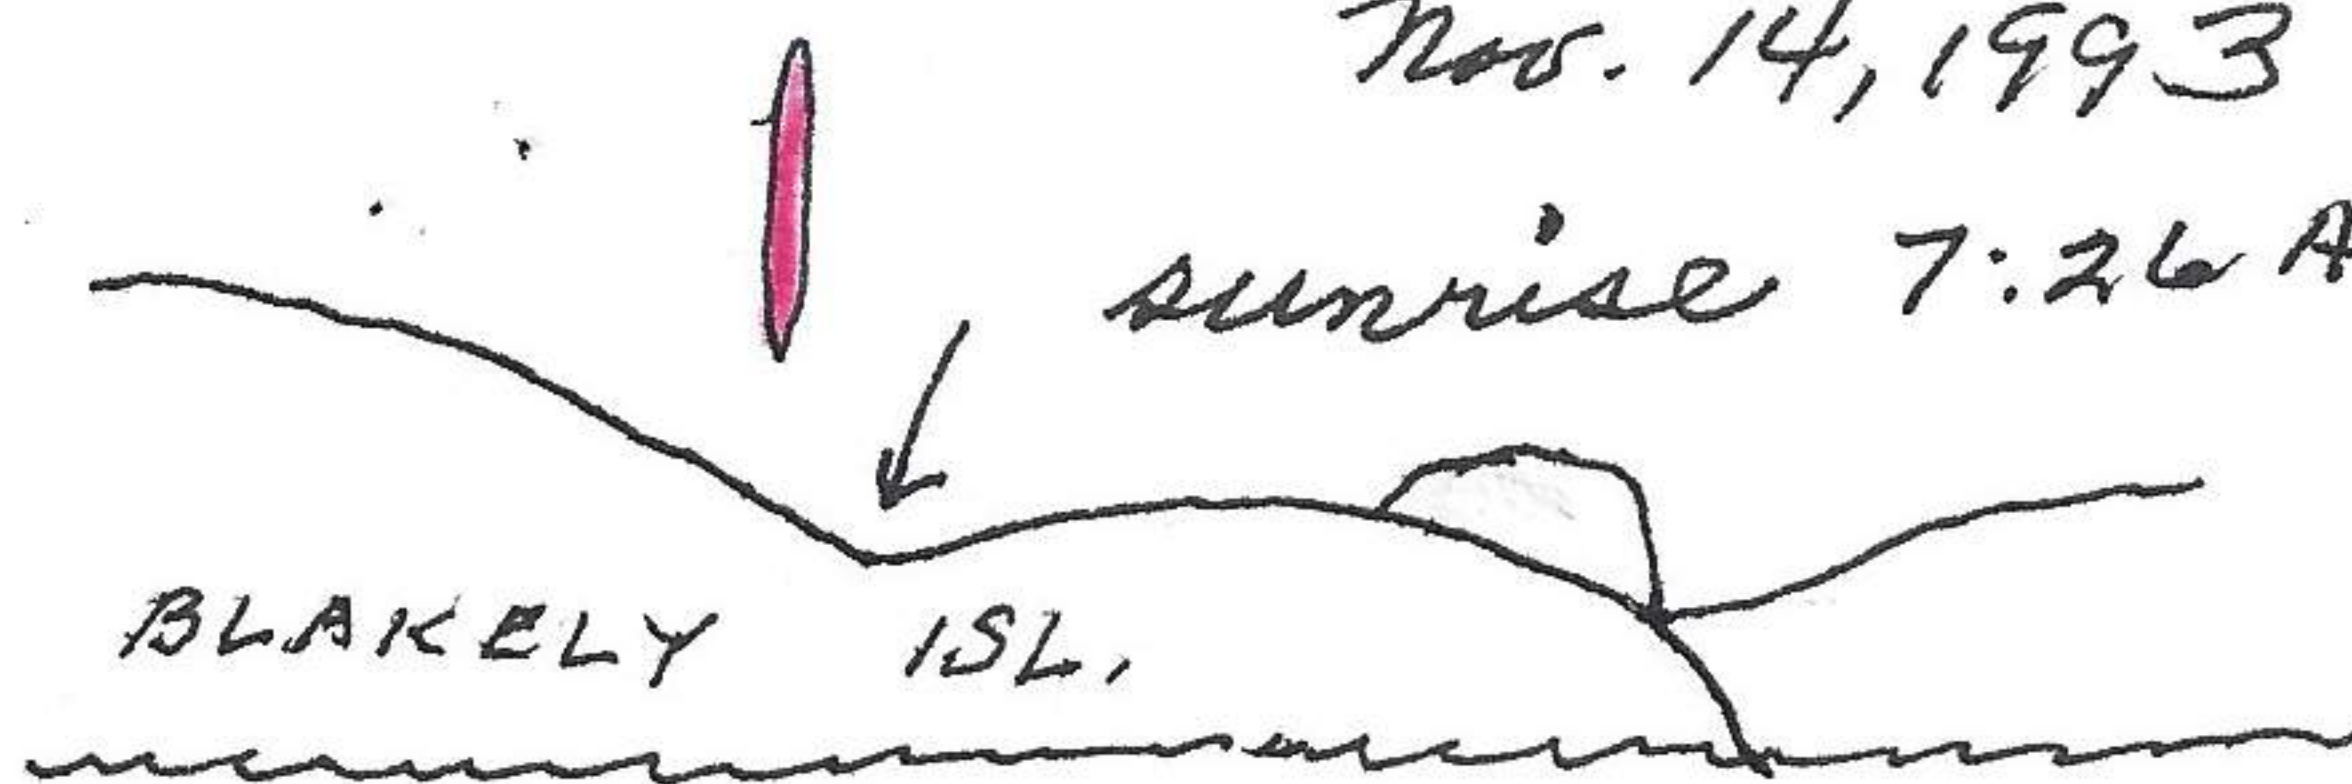

Photo 931114-1 of sky (sunrise color) from living room Bee House.

Photo 931114-2 from living room Bee House 931114-3 ibid

Stationary light streak below Procyon in Cabot's mirror. See above

First observed full intensity at 12:20 A.M. then gradually faded to 0 at 12:30 A.M.

This A.M. wind from NE, temp 21°F. Took several photos showing this condition. Wind 40-60 MPH

931114-5 salt water freezing on Lichen Point.
