

Antje and Keith Gunnar report. "mt goats present in the Olympics as observed by S.C. Gilman, National Geographic, 1886, "1884 Capt. Flattery natives manufactured blankets from wool of wild goats." Seattle Press, July 16, 1890 Capt. Charles A. Barnes, member 1889-90 Press Expedition thru Olympics, one goat seen by party."

April 3, 1994

To Anacortes 10:20 A.M. There were 2 log trucks from Lopez Island on boat, one had 18 logs, the other 16 logs. On one truck 1 log diameter 36" (Doug. fir) one measured 56" diameter (cedar), 9 others from 30"-50" diameter

April 5, 1994

7:15 A.M. most bald eagles fly straight N or S past Bee House at about 60 feet above water and 20' out from shoreline. One immature bald eagle, however, circled 5 times between Bee House and Leechen Point. At one point it alighted on Flat Point and fed on scraps of debris there. 2 American Crows challenged the bald eagle by striking the eagle's back but with raised wings it was able to ward off the crows. The eagle finally left crows and flew N past Bee House with food in talons. For last 3 days 2-3 imm. eagle have been observed, 4 together one early A.M.

April 7, 1994

To UWMC for vocal cord surgery. Stayed Chris' home on Last Lake this evening. Jay from Kansas here.

Collected a shrew-mole neuroticichus gibbsii at Chris' home, Last Lake, Snohomish Co., Wa. no. 940407-1

Chris reports a Canada goose in 2' corridor between Boeing building at Everett and sidewalk, nest with 3 eggs, ♂ nearby. would attack people walking on sidewalk past nest.

UWMC - begin chemotherapy - Dr Thompson and nurse Dr. John.

April 18, 1994

at UWMC had percutaneous endoscopic gastrostomy.

April 22, 1994

Left hospital to Chris.

April 23, 1994

Left Chris' for Lopez Island, and arrived later same day.
