

1:11 PM Harbor seal in area:

40 seal on Les Reef Rock # 9 all high on rocks. no other
9 " " " " " # 11 seal in area.

4-6 rufous hummingbirds at feeder every day.
no bald eagles on nest NE front. young may have left nest.
when tides are - the waves disturb mud deposited by the
O'Leary landslide a year or so ago. The mud clouds the water
a brownish muddy color and is distributed mainly on SE entrance
of Spring Cove. However waters can become muddy in cove, and out-
side Cove into the sound for as much as 100'.

8:15 A.M. 6 rufous hummingbirds at feeder at one time. one held its
bill in hole for 8 seconds without interruption. For a period of 1 hour
at 5 min intervals recorded the frequency of feeding:
