

Caretaker was more than glad to take us for a hour ride from Ilmon Lake, through Conal to Washington Lake and back. The Caretaker at one time had flown the air mail from Seattle to Alaska as well as having done considerable boating. The main point he brought out was the fact that if one were to make a trip to Alaska, he should be sure that one be prepared to find a rainy country and to take clothing and equipment to cope with the weather. S. E. Alaska is very wet but interior Alaska like Anchorage is pleasant as far as the rain is concerned. He did not suggest a Conal trip when asked as to the feasibility of using one on such a journey. One can see Mt. Baker and Rainier from Seattle standing literally in the clouds. One very frequently confuses them with clouds.

We visited these people about 3 years ago. Remained here 9th - 10th 11th and morning of the 12th. At Glide had the chance to take a photo or two of Eileen along Unupqua river near their home.

Took picture of Ray riding the front of the boat while Cub steers. Leaving Seattle we drove to Centralia where we stayed a cabin camp. 7-8-39 Left Centralia and followed 99-99E-99 to Roseburg then east to Glide on the Unupqua river where Mr. & Mrs. Mc. Miller live. Mrs. J. Mc. Miller is Mils sister.
