Inspection of research area B-8-6-39 at 9:00 P.M. revealed one *microtis*. Bed at 11:00 P.M.

8-7-39 - Station 1, West Canyon, Rhodes Cabin.

Sun up about 6:10 A.M. Day clear and prospects of a good clear trapping day. Breakfast over & left of routes. Inspection of research area B-8-6-39 showed the remains of one *microtis* foot in trap. It appears, ^{as} if a larger animal had visited the area and had disrupted the set by pulling at this one trap with *microtis* in.

Inspection of research area A-8-4-39 at 7:00 P.M. gave the following results.

1	unaffected	25	Peromyscus
2	<i>microtis</i>	26	unaffected
