- 121-122 - as indicated in series no. VI
- 123-131 as indicated in series no. VII.

Established this area between 5:00 P.M. + 7:05 P.M. The traps were placed as near to being 15 feet apart as possible in all cases. Baited with oat meal. While setting this line observed one nighthawk to dart at another and created the vibrating roar of their wings at 15 minutes after sun down.

8-13-39 Station 2. Chimney rock Pass.

at 7:00 A.M.

Made inspection of research area A-8-12-39 before breakfast.
