

- (5-9-20-39) *Peromyscus* 150-71-20.5 - ♀ 13grs uterus ok.
- (6-9-20-39) *Peromyscus* 155-71-20 - ♂ testes 3 m.m. 14grs. Pelage with purplish greyish brown.
- (7-9-20-39) *Peromyscus* 144-66-20.2 - ♀ 13grs. ut. ok
- (8-9-20-39) *Peromyscus* 166-78-20 - ♀ 20grs. uterus ok. mammal very fat. Pelage intense in color.
- (9-9-20-39) *Peromyscus* 151-72-20.2 - ♂ 15grs. testis 3 m.m. pelage a light brown.

measurements and preparation of mammals from research area no. C-9-19-39

- (10-9-20-39) *Peromyscus* 150-66-20.2 - ♀ 14grs. uterus normal and surrounded with fat. Pelage greyish brown.
- (11-9-20-39) *Peromyscus* 152-69-21 - ♂ 16grs. testis 3 m.m.

This afternoon set another line of traps in research area no. A-9-20-39 on the the main terrace in middle of cirque. Set out 150 traps from 3:30 P.M to 5:30 P.M. This area is the most likely of all the areas for *Peromyscus* and *Clethrionomys*. However it is not continuous with the higher terraces above. The vegetational growth is of the aspen conifer association and it seems to grow mainly on the north exposure of the terraces with clear field to the south. The vegetation is dense and in many places is not accessible to the sheep. Set a series of 150 traps here in three series. 51 to 100; 50J-1J.; and 1B-50B. These were placed in a continuous series. The distance between the traps are:

|           |           |           |           |
|-----------|-----------|-----------|-----------|
| 51.       | 75-100'   | J. Series | 22. — 15' |
