- 52-73 unaffected
- 74 sprung
- 75-85 unaffected
- 86 sprung
- 87-89 unaffected
- 90 sprung

At 1:00 P.M. took two pictures. One 43-9-21-39 from the west side of the crevice showing the crevice bank and the aspen research area on the east side of the crevice floor. The contact between the grey-blue limestones and the upper sandy limestones is shown. Note the regular stepping up of the successive cliff outcroppings. Other features are shown in this picture as indicated.

(picture at end of report on 9-24-39)
