

upper teeth <sup>391115-281</sup> made one complete turn and forced themselves into roof of mouth. The lower one were long and turned out like mammoth tusks. Food was packed in circular area of upper teeth. This animal no. 1-11-15-39 measured 445 mm. - 225 mm. - 74 mm. and weighed 280 grams ♂. Skull in university collection.

12/2/39

Last few days exceedingly clear at nite with deep blue.

12/2/39

Dad collected 2 Snow Geese on Farmington Bay Project in Davis County. No. 1-12-2-39 measured (in inches)

length	26 <sup>3</sup> / <sub>8</sub>	toe	3 <sup>1</sup> / <sub>8</sub>	♂ (?)
tail	5 <sup>1</sup> / <sub>16</sub>	tarsus	3 <sup>1</sup> / <sub>8</sub>	
wing	16	bill	2 <sup>3</sup> / <sub>16</sub>	
wing spread = 55 inches.				

The other no. 2-12-2-39 measured: (in inches) from a picked bird.

length	—	toe	3 <sup>5</sup> / <sub>8</sub>	♂ (?)
wing	17 <sup>1</sup> / <sub>2</sub>	tarsus	3 <sup>5</sup> / <sub>8</sub>	
tail	—	Bill	2 <sup>1</sup> / <sub>4</sub>	
stretched wing spread = 60"				

Had this bird for dinner. Was rather tough and skin exceptionally melamstic. Buzzard had indescribable odor after cooked.

12/3/39

Lynn Hayward reports that at Mud Lake Channel the blackbirds (probably red-wings) flew west from the mud lake area in one solid flight just at daybreak for about <sup>1</sup>/<sub>2</sub> hour. I have witnessed this some thing several times and one wonders if not all the black birds in the world have not passed by.

Bob Newell reports 1 dead 4 point buck at head of south fork. one on divide of Windy Pass in head of Rock Canyon.

12/3/39

Lowell Hansen sent a flying squirrel from 10 miles n.w. of Bryce Camp. on. Collected nov. 22. Remounted and placed in university collection. It is probably *Glaucomys sabrinus lucifugus*. Lowell's original measurements are somewhat in error and are. 400-165-39 ♂

12/3/39

Sparrow hawk calling and resting on upper B.G.U. campus. at Provo, Utah. at 11:30 A.M.

12/16/39
