Shefeldt (?) Junco	Great horned Owl.	Gull, Calif.
English Sparrow		

Heard a few W. Evening Grosbeaks and one Waxwing in Provo 3/27/40

Rained all night and clouded the two previous days. Curb and gutters  
in city filled to capacity and overflowing. 3/28/40

At 3:25 P.M. rain turned into slight sleet 2 seconds after wind front arrived  
at my presence. 5 minutes later it thundered and almost instantaneously  
the sleet formed into a blizzard and after 5 minutes all was quiet and  
skies partially clear. 3/28/40

W. Evening Grosbeaks in evidence in city in considerable numbers 3/29/40

Started field Ecology class under C. Lynn Hayward. This Biocology  
class is divided into 3 groups of 3 members each with each group  
carrying on the same routine procedure. The results of each group  
are compiled and <sup>are</sup> accessible to every individual. Our first trip of field  
was at the Provo River floodplane to make an aspection study. 3/30/40

Purpose. To study and note the seasonal changes in animals of a  
given locality over two of the spring months. The several times the  
area investigated will be followed in uniform procedure. This  
floodplane aspection study will be repeated besides today. April  
3, April 27, May 4, May 11, May 25. Arrived at the property of the  
Provo Brick and Tile Co., north of Provo. Established station A-3/30/40  
on the west bank of the Provo River. This station is in a typical  
cottonwood river bottomland of the Provo river. situated in the river  
valley cut between or out of the Provo terrace of Lake Bonneville. The  
valley is not a typical floodplane or at least does not receive a periodic
