

Left here at 10:20 A.M. and return to divide ⁴⁰⁰⁹³⁰⁻¹⁷¹ ^{at 9:30 A.M. and}
then up over maple flat mt to maple flat ^{sheep flat}
spring to point as of 8:25 A.M.; hence down regular trail to
car. Day clouded around mountains but clear to west.

Birds observed:

Batchelder Woodpecker: Observed 2 or 3 at sheep flat.

Hairy Woodpecker. 4 or 5 along course mainly up slide
and in vicinity of sheep flats

Junco Generally distributed. (conspicuous)

Robins Indication of migration along Wasatch front but
not noticeable back in range. one flock of 32 birds flew
to south at the y. on the front. Saw on Ogurk range at
7:21 A.M. being late because of cloud interference along Wasatch.

Red-tail hawk. Two birds at Cold Springs flying together.
They gradually gained elevation and circled high above.

Sharp-shin. One flew north near divide west of cold springs.

The hawks were few and indicated no migration

Golden eagle 2 birds flying along mt south of the
divide of first left hand of State Canyon.

Pine-siskin. One group of birds

Aud. warbler. Intense migration in general but mainly
in aspen grove in vicinity of sheep flats

Utah Jay. a few mainly in slide. From the Devils
gate the woodhouse is generally replaced by the Utah Jay.

Clark's Crow. One group and few individuals.

Nuthatch (red-breasted?) Frequently heard and associated with
Warblers. The canyon of upper slide that enters sheep flat was
main migration lane.

Woodhouse Jay. One front of range

Mt. Bluebird. Few on ridge west of Cold Springs

Salitaire " " " " " " " " " " " "

Other warblers were present but could not identify positively.
No marked migration of hawks as of last trip on Mt. Timpangos.
Could see the pelicans from maple flat mountain. They were
congregated on rock island on the west shore - north end and
plumbea swimming S.W. of island. Also a small group on
first point south of mouth of Crovo river, one small group
south of Geneva in lake.

Mammals observed

Deer. numerous tracks from 8:25 A.M. on up slide. The
deer were found in association with aspen and tracks in
trail all points. The north and west side of maple flat mt
used for bedding grounds.

Thomomys. Tracks in snow

Eut. d. utahensis One, face of mt.

Eut. m. conso Heard but did not see

Eut. umbrinus Watched one call arounds from fir tree.
