Temperature of water in lake at 6:30 A.M. = 14° C.  
 Recorded the following picture of the island. no. 11-5-8-41  
 of nest of gulls with albino egg. no. 12-5-8-41 of west  
 bay of island with California Gulls in foreground and  
 nesting gulls in background. <sup>distinct</sup> Trumpetwings in background.  
 no. 13-5-8-42 of main nesting area of island.

11-5-8-41

13-5-8-41

12-5-8-41

.60 Caspian tern nesting.  
 Of the eggs of the Gull  
 examined found the largest  
 being 2.85 ~~mm~~ of an inch  
 and the smallest 2.35 inches.  
 Made a collection of the  
 more or less unusual in  
 eggs, particularly of the  
 more interesting albino  
 sets.
