

Next time I write I'll perhaps be lazy enough - you hope -  
to spare you the misery of all those check list records.

By the way - the Snake trip disappointed me quite a good deal - don't know why. The Night Herons were found about 25 feet off the ground in the willows which were lining the bank on the south side.

Don't know just where I'll go this Sunday. May have to work in the geology dept. on some maps for me of Dr. Webster's lectures. He came around just today and asked me to do the work. You see, I had delayed in signing for the job in order to ascertain how much time my studies would be taking. However, I think it will work - but I'll be working too - of that you may be sure.

French isn't so bad. I think I'll make it. Chera is coming I hope and my English classes are alright so far. So will do, too I think. Gymn is really a good work-out. We

do calisthenics for 20 minutes hard - then go outside - run a simple obstacle course, - run around the field once and scream. Between times they teach us jir-jitter. Some stuff that guy science. We have that 2 times in the week and the third period of gymn per week we have our choice of activities. That's because of them I'd say!!

Well, you, I certainly wish you good health and happy hunting. Hues to the old man old and its green wooded hills. By the way, if I can I'm going into V-1 in the Navy. I don't like the looks of the polished reserve that the Army contains. However, that's neither here nor there.

At any rate say hello to the lady for me - and don't get drunk too often. By the way I'm kidding.

So love & kisses,  
Pellie ☺
