

always disliked being only partially complete in recording but somehow I have not had the opportunity of keeping up a journal as I had originally intended. However if you will bear with me I will try to present a general picture of situations and things that has transpired and which help to indicate my present position. Perhaps an itemized listing of my itinerary will give you an over-all view of the peregrinations of Army Jion. I think that you already know in a general way about my movements but here it is in all its unmitigated exposure. I have had to hide this several times when moving forward but now I have no fearful communication in putting it in print:
