

Had Dr. Hayward's class in the field today. Examined Heron and Cormorant rookery in Provo Bay. Left mouth of Provo River in a boat and rowed to the area. ^{10:00} Left A.M. and return 4:30 P.M. Observed the following.

<i>Numenius americanus</i> 8	<i>Phalacrocorax a. a.</i>
<i>Oxyechus vociferous vociferous</i>	<i>Sterna forsteri</i>
<i>Steganopus tricolor</i> 12	<i>Telmatochelys palustris</i>
<i>Recurvirostra americana</i> 12	<i>Larus pipitcan</i>
<i>Larus californicus</i> 40	<i>Hydroprogne caspia</i>
<i>Phasianus colchicus torquatus</i>	<i>imperator.</i>
<i>Plegadis guarauna</i>	Hummingbird.
<i>Passerculus sandwichensis</i>	
<i>Pelicanus amerc erythrorhynchus</i>	
<i>Larus californicus</i>	
<i>Tachycineta thalassina lepida</i>	
<i>Riparia riparia riparia</i>	
<i>Iridoprocne bicolor</i>	
<i>Deafila acuta tzygthoa</i>	
<i>Anas p. platyrhynchos</i>	
<i>Agelaius phoeniceus.</i>	
<i>Euphagus cyanocephalus</i>	
<i>Podiceps grammurus.</i>	
<i>Chondrestes grammurus.</i>	
<i>Limnodromus griseus</i>	
<i>Aechmophorus occidentalis</i>	
<i>Spatula clypeata</i>	
<i>Branta canadensis</i>	
<i>Larus ludovicianus</i>	
<i>Melospiza melodia</i>	
<i>Querquedula cyanoptera</i>	
Sandpiper (?)	
<i>Fulica americana</i>	
<i>Pica p. hudsonia</i>	
<i>Lophortyx californica.</i>	
<i>Sturnella neglecta</i>	
<i>Ardea herodias treganza</i>	
<i>Passer domesticus</i>	
<i>Vireo gilvus swainsoni</i>	
<i>Zenaidura macroura macroura</i>	
<i>Dendroica aestiva</i>	
<i>Dendroica auduboni</i>	
<i>Colaptes cafer calcaris</i>	
<i>Tettion carolinense</i>	

12 Franklin Gull circled high in the sky above the rookery in Provo Bay. They called continually.

Found a Pelican that had caught itself on a fence line in an inundated pasture. Its leg was broken so I brought it home and applied a copper splint. Released it 4 days later at the mouth of Provo river. Treganza heron have full clutch of eggs in many instances. Many nests deserted from trees. Beaver house at mouth of channel.
