California Gull
on dike of the
Genova Steel Plant
in Utah Co. Con-
cerned with nest
of one egg placed
in foreground.

California Gull
swerving upward
from its recent-
ing attack. 500th
second. The best
time to photograph
these birds in the
air is during a
wind day when they
seem to hover directly
above.

Annette at gull
colony. These gulls
have used this
artificial dike for
the last two years
and remain undisturbed
nests placed from water
edge across entire
dike area. Young in
predominance at this
nest
