Rebaited traps with standard oatmeal.

3 1/2 mi SSW Pleasant Grove, Douglas Co., Kansas
March 19, 1948

Rained at 10:00 P.M. last night and left considerable water on surface of ground. Shelters used by *Sylvilagus* were water soaked on the floor surface. Runways of *Microtus ochrogaster* generally with supersaturated surface or standing water. Considerable amount of downed vegetation with standing H₂O. *Microtus* ground holes with water to brim. Creek increased volume 1/2 per cent. all traps sprung except no. 20. Frogs calling and meadowlarks singing. Since daybreak, weather clear. Inspected trapline at 8:30 A.M. and finished at 9:45 A.M.

From research area B-3-17-48

269	<i>Microtus ochrogaster</i>	1-3-19-48
