

max. 66°F for last 24 hr. period.

Wabao Lake, Brooks Range, Alaska

July 11, 1952

Steel traps with 1 *Spermophilus* only. measured and prepared yellow-billed loon 520709-28 and 520709-29 as: ♀ 850 total length 380 wing, 1500 wing spread, 10 lbs wt., ovaries ♂ 900 length, wing 390, wing spread 1570, wt 15 lbs, could not find testes. measured bear paw at camp (imprint) as 255 mm hind foot from claw, front 165 from claw. Had breast meat of loon for supper. Good tasting and meaty as result of close arrangement of muscle fibers. No fish odor or taste. Breast muscles small, leg muscles large. Saved head and neck feathers. Water leaving lake reduced 60% since arrival. *Carex* and sedges growing noticeable into good green stands. *Carex* now becoming conspicuous with white flowering units which have developed in the last week. 4 mt. sheep on NW hill all afternoon (2 years + 2 young). Temp midnight 44°F, min 36°F, max. 66°F in last 24 hours

natural size.

July 12, 1952

Collected grasses and sedges 520712-1 to 520712-15 from Wabao Lake along erosional creek, along edge of main canyon of Ivashak and side Canyon leading into canyon to south, mainly in areas where there was less competition with mosses and lichens:

- 520712-1 *Carex membranacea*
- 520712-2 *Carex lugens*
- 520712-3 *Carex aquatilis* Wahl. var. *stans* (Drejer) Booth
- 520712-4 *Carex lugens* Holm
- 520712-5 *Poa glauca* Vahl.
- 520712-6 " " "
- 520712-7 *Bromus pumellianus* Scribn.
- 520712-7a *Arctagrostis latifolia* (R. Br.) Griseb.
- 520712-8 *Calamagrostis purpurascens* R. Br.
- 520712-9 *Festuca scabrella* Torr.
- 520712-10 *Trisetum specatum* (L.) Richt
- 520712-11 *Carex consimilis* Holm.
