

availability of navigatable slopes. many places show evidence of slumping with accumulation at canyon edge.

All peaks jagged and in sharp outline above a certain elevation. Arrived Parcupine Lake about 6:00 P.M. Camped at SW end of Lake. Bill Broge reported a porcupine on the Washak River near our camp. Set traps (150) in creek and along side-hill at the south end of lake. Examined cache about 200 feet from edge of lake placed this spring. The barren ground gizzly had opened one 50 gallon steel drum which had a top bolted down but enough room for the bear's claw to get at edge of lid to pry open. I could not bend this lid. The 5 gal. waterproof cans were chewed and the contents eaten. Itemized, the following foods were either eaten or not eaten:

Bolted

top opened by bear

NOT EATEN

1 pt. jam (lid off but jam not touched),  
 canned green beans, canned  
 gooseberries, canned corn, can-  
 ned peaches, canned pineapple juice,  
 canned grapefruit juice, canned  
 asparagus, dry beans (sacks open),  
 dry peas (sack opened), candy bars  
 tested by the bears but not eaten,  
 all stove fuel cans punctured and  
 drained, kerosene cans punctured  
 and drained, dill pickles.

EATEN

white flour  
 canned rye bread  
 crisco  
 butter in cans  
 dry eggs  
 aunt Germina flour  
 pie mix (crust)  
 corn beef hash  
 canned chicken  
 Food mainly within 15' of  
 cache but some beans 50'  
 from cache.

The cache at Waboo Lake also  
 raided by the barren g. gizzlies.
