

Mr. James W. Bee
Page 2
August 14, 1954

The identification of these grasses was made by Ernest R. Sohn.

I believe that this, after these many years, completes the identifications of all of the Arctic collections. If there are any I have missed, I shall be glad to hunt them down for you.

If you get home this summer, be sure to look us up. Best regards.

Yours truly,

Bertrand F. Harrison
