Ex. Office, Washington, D.C., 1835 Eye Street, N.W.

March 27, 1953

Examined Dicrastonys (ex. no. 530311-1) as follows:

weight of no. 530828-1, 46.6 gms; weight 530506-1, 43.8. Both animals show gradual increase in weight. The no 530506-1 molt shows that the two symmetrical sides of the animal molt independantly thus:

no 530506-1 almost stabilized but changes, although minor, are still taking place. Distinct patches in front of ears and ventral have become segmented. no 530828-1 with long hairs growing posteriorly over ears which are obscuring the ears. Posterior molt lines still distinct. Side showing a general whitening. The area immediately back of ears has never shown a distinct white
