GUATEMALA, C. A.

of wild animals as he has many requests from the states to supply wild animals to zoological parks and experimental laboratories. I may be able to <sup>show</sup> him some of the animals he may be interested in. I asked him if he <sup>had</sup> ever been approached by any institution to supply logistic support to a zoologist for collecting animals and birds on his many field parties working in Guat. He said no but thought it a good idea - at which point my responsibility ended. If Hall wishes to take on from there he may. To use University finances to further my personal interests would be frowned on by Hall.

I have two other trips to make in Guat. and then I start packing for home. Will write to you on return from Peten.

It's good to hear that Pally is well again and I hope Chris & Pally had a good birthday. Sorry I could not send some ammunition for their guns!

Love  
James
