

Grand trip to Alaska. I  
can't tell you about that  
trip. It is still too far  
ahead for me to figure def-  
initely. I should urgently  
like to go, & wish I can.

I am going to collect some  
sea lions - (Lutons) - for  
the California Academy of  
Science. This will probably  
be my last trip after this  
species. I am going about  
mounting a big bull. It

you do, now is your chance  
to get it. I can send you  
a selected specimen & you  
can pay for it in other  
material that the Academy  
might want in exchange.

If you want the bull & any  
sons or pups of this species  
let me know at once - by  
return mail - so I will  
know before I go.  
I am busy working away on  
groups of large mammals
