- 620402-17 slate-colored junco. 148 mm t.L. - 19 gms ♂
- 620402-18 tree sparrow 155 mm t.L. - 19 gms. ♂

Other birds in the wooded area were:

- Crow. One concerned as if nesting or on territory.
- great horned owl. one, probably nesting in area as it circle area but did not leave
- turkey vulture - Pair flew by overhead.
- great blue heron. one flying east along n side of valley.
- winter wren. a dark wren flew into an erosional gully. This gully was unusual in that the roots still formed a network on surface of ground but gully 8 feet or so deep and four feet wide. The older gully of about 3 feet deep was 20 feet away a parallel to the new one. 
- The wren flew into this section of the gully and I could not dislodge it. Several good deep meanders of a small creek in this area.
- titmouse, bedded. several during the entire time I was in area from 2:00 P.M. to 5:00 P.M. On three occasions a ♀ bird flew directly to me from about 200 feet away and lit within 20 feet of me. They remained a few minutes and then continued on. One flew across the Wapakoneta River to inspect me.
- Robin. 8 in area in loose group.
