1 mi. ^{SE} ~~SW~~ Leavenworth, Cove on Missouri River, Leavenworth County, Kansas

Jan 10, 1963

Lynn Hall presented me with an Eptesicus f. fuscus from cove at above locality. It measured:

630110-1 Eptesicus f. fuscus. 124-48-12.5-17 - 19.5 gms ♀ 
Extremely fat, some areas 4mm thick.

He said that he judge there to be about 18 big brown bats in these coves and they captured 8. Some were flying about the cove, some in crevasses and one in a cuplike depression on side of cave. Some were on smooth surfaces of the supporting column.
