1³/₂₀ mi. N and 2¹³/₂₀ miles E Clinton (center of town), Douglas Co., Kansas.

Jan, 3, 1964

Set 50 traps in same area as Jan 2 but in a line about 100 feet to the west. Temp. 47°F. Another line of 50 traps ^{was} ~~is~~ set in a field (edge of field similar to Edmond set) some .4/10 mi. W of trap 1 of the Jan 2 set.

The second locality of traps 50-100 is at. 1³/₂₀ mi. N and 2¹³/₂₀ mi. E Clinton (center of town), Douglas Co., Kansas.

This site is along ^{elevated} crossonal of bar in areas where it is difficult to cultivate and soils have been allow to grow to high grasses. The field to E of here is growing grass and was ^{burned and} plowed last year. This field supported microtines to capacity and after burning showed a complete obliteration of the field by these mice (microtines). It was a field that had been in soil bank and had not be plowed for the last 10 years.

Jan, 4, 1964

Picked up traps set last night. Temp 29°F at 8:00 A.M when checking mammals. Last night was able to thrust trap stake in soil but this morning the metal stakes were frozen in soil.
