2-11-2-28

6-22-28 (late insertion)

These two pictures were taken on the other side of Utah Lake at the Heronery south of Pelican Point at the Indian Knolls. Here is found a colony of Herons nesting in the large cottonwood trees. At these heron trees found many heron nesting in the trees but also evidence of slaughter by hunters. The nests are placed at most every angle of the tree.

Picture no (1-6-22-28) shows Mary my sister leaning against ^{one of} the trees in the colony. Utah Lake is immediately bordering the colony. The other picture (2-6-22-28) was taken along the the lake shore showing the Indian knolls and pelican point to the N. east. Mt. Timp and Cascades in the horizon. The shore line is shown with the extent of vegetation present.
