

1613 Tennessee St, Lawrence, Douglas Co., Kansas  
 April 29, 1964

Collected the following reptile from above locality.

- 640429-1 *Ophisaurus* body length 180, tail 239, wt in grams 34. This lizard was taken dead on walk at the NE corner of the Maupin residence <sup>at 8:00 A.M.</sup> It had been seen the previous evening in same position. Gardeners had been raking the lawn and leaves from shrubby and may have killed the lizard. One eye of the lizard was extending beyond the normal position as if it had been hit on the head, although no other signs of damage were observed. The Maupin Estate includes a hillside slope of deciduous trees and several other groups of dense shrubs and high trees as well as open grass & weed areas. Photo 640429-2 of this lizard with mass background.  
640429-3 *ibid.*  
640429-4 lizard on venter of box turtle.

5 1/2 mi. N and 1/2 mi. E Lawrence (P.O.), Jefferson Co., Kansas  
 May 2, 1964

Mary Pauline and I collected the following from area of old quarry at top of hill (to right).

- 640502-1 *Sceloporus punctatus* 275 body, 49 tail, 10gms.
