

370628-60
 Observed hummers without the accompanying rattling flight sound. An Eagle (Golden) flew across cirque. Watched the adult Clark Nutcracker feeding its young. Considerable noise accompanied feeding and trailing of the young. The Clark nutcracker has two distinct calls, one a sharp warning call and the other a drawn out call that is offered when feeding their young. Watched a white Crown sparrow and a robin chase a Clark Crow. At the surge of the Emerald Lake - Am. Fork Cirque found six leucosticte. They remained quiet for 3 minutes after giving their first warning calls or chips. They finally left and flew out across the cirque in typical goldfinch like flight. Am. Fork Cirque mainly covered with snow. 2 Rock Wren & several swifts pass by at same divide. Several pika in talus slopes near bottom just north of Emerald Lake. After making a ~~gong~~ general survey returned to Station 3 at Aspen Grove.

6/29/37

At aspen Grove observed a Wood Pewee flying some 200' above tree tops. Examined a R. naped Sapsucker nest on moranic bench among conifers on south side of canyon at aspen Grove. Nest of young placed in a live aspen tree 35' from ground and 20' from top of tree. Young called continuously especially when being fed. Spent the entire day preparing Scurus, Pika and marmot. The pika and marmot were taken from talus slope just west of brochypod gulch at base of Elk Peak. Their numbers are:

97	Sciurus h. venturum	100	Sciurus h. v.
98	Sciurus " "	101	Sciurus h. v.
99	Sciurus " "	102	Marmota f. n.
		103	" "
		104	" "
		105	Ocheytomys
		106	Ocheytomys

When these animals are fat and greasy they are most difficult to prepare. Worked until 2:00 A.M. next morning to finish up.

6/30/37

Continued preparation of large animal forms today including:

108	Marmota f. n.	Mammals taken at aspen Grove
109	Marmota f. n. (skull only.)	
107	Bufo t. b.	

7/1/37

Today prepared the following.

110.	Marmota f. n.	Taken from Aspen Grove.
111	Marmota f. n. var.	
112	Callospermophilus.	From ledges S + E. of first falls.
