

Lone Star Lake, Douglas Co., Kansas

Sept. 10, 1968

at twilight, heard a whip-poor-will calling from ridge  
NE of the E end of dam. It called from three different  
positions. at about the same time a Canadian goose  
flew S across the lake and 5 ducks (small) crossed dam  
from the north and without deviation flew S across lake  
and beyond at about 50' above water. The body of water  
did not influence these ducks. A spotted sandpiper worked  
and called from rocks on dam. The whip-poor-will was  
heard about this time of evening on <sup>the</sup> previous weeks Sept.  
3.
