

This ski course offered us some of the best ³⁸⁰²¹²⁻²⁸ of turns ever gained before. The course was fashioned ^{practicing} into a slalom run with four main turns. Being banked where needed the run offered skiing at quite a high speed. Tempis and Christies were used and developed. Craig learned the plow turn for first time and Blaine the Tempo or Christiana for his first time. Harry developed his turns to the extent that his chances in the slalom race next Saturday may be fully appreciated. Being so near to camp we stayed until dark overcame us, and again the first thing in the morning were on the course again. These pictures while taken without sunshine and in a fog, at least preserves a record of the first lessons in turning. Craig developed confidence and shows his mastery of the plow or variety of stem turn. He is now able to make the turns without with forms and end up run without a fall. This new technique will allow him to gain more fun and pleasure on the more open slopes.

Craig 3-1-19-38

Harry 4-1-19-38

Harry 6-1-19-38

Blaine 5-1-19-38

Blaine 7-1-19-38

Harry shows his mastery of the high speed turns with his Christianas & stem turns. All picture taken on 1/300 sec and wide open. No sunshine and dull day.

Blaine handles the tempo as if a master but actually has just been taught the turn only an hour before.
