Summation of mammals from 12/10 mi. N and 18/10 mi. W Lawrence including the Kansas Power & Light high line right-of-way and the fence line on the S side of the Turnpike right-of-way (see map of may 26 of trap lines in field). These include all mammals collected on various dates from April 21 to may 31 and represent open field community. While there was a tendency for localization of species, all species at one time or rather were collected in the same runway and even trap.

| | |
|---|---|
| Blarina brevicauda | 3 |
| Synaptomys cooperi | 29 |
| Microtus ochrogaster | 37 |
| Peromyscus maniculatus | 18 |
| Reithrodontomys | 3 |
| Sigmodon hispidus | 7 |
| | 97 |

From may 20 to may 31 collected the following mammals from a trapline of 12 live traps. These traps remained in same position and were inspected every 24 hours:

| | MAY | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | 20 | 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 | 31 | Total |
