 vulture. 17.8 deep cut road beds, 2 turkey vultures. 23.1  
 good geological road cuts, mainly sedimentary layers of  
 loosely consolidated material. 27.8 turkey vulture. 33.2  
 Joybas, reservoir of about 1000 ducks. 46351. Lago de  
 Guadalupe trailer camp. at camp noted a myrtlelike  
 warbler, flock 38 Bohemian woodpeckers and a goldfinch?  
 at 4:00 P.M. Spent evening in Mexico City. This city is so  
 arranged that a stranger finds it almost impossible to get  
 around, especially as landmarks are obscured at night. Unless  
 one knows the town he is carried by the traffic with choice  
 of direction. Some intersections have as many as 10 entrances,  
 each one crowded to capacity with cars. To change lanes  
 in these intersections requires knowledge, agility and courage.  
 To make changes of lanes one must force himself into traffic  
 with inches the car into traffic with waving hand. The traffic  
 is simply insane and the drivers use the street as a traffic game
