

mud at bottom of drainage. This would be a good area to check stratigraphic profile of valley, 4 tree sparrows, 7 bobwhites, 2:00 north end of gate of bay (a gate is the construction of a larger body of water to a smaller or inlet). From this location can see directly west a <sup>background</sup> flat ridge that connects two prominent ridges or terminal knolls. 8 tree sparrow. ~~4~~ From this point on there was a malfunction of the recorder and no information was recorded beyond this point. The route continued along drainage however, to bridge 920 and thence return by county road to Ferguson road thence back to car at Slough Creek bridge. Walked entire way. One return at white pines on Ferguson Road while looking up to see if mature cones were present, experienced an abrupt nausea and dizziness that continued for some time. Mileage from Slough Creek bridge to end of census 4.1 miles. From end of census to bridge 920 1.7 miles. From bridge 920 to Slough Creek bridge 5.2 miles or a total of 11.0 miles.

### Summary of birds.
