

There are differences between this area and say the west coast:

1. No pollution on beaches even in most concentrated areas of Bar Harbor at fishing wharf. Not a single can or paper or foreign product.
2. Gulls not in area around habitation. Not one gull at docks. Several flew by at high elevation.
3. Marine Crafts are small, and few in number.
4. Stores are not commercialized and are generally distributed, not for instance on one street.
5. Homes too large for such a far removed area of the country.
6. All home reconstructed and painted, many homes joined to bar
7. Driving considerate & moderate.
8. Marine waters relatively calm.
9. Birdlife in general sparse.
10. Canada has developed its area better than Maine.

12. Left at 3:00 P.M. at mileage 54987 for Campobello Island in New Brunswick. Trees are becoming more coniferous and smaller. Crows still most conspicuous and generally distributed along way of any bird, generally in pairs or groups of 3-6. at 54027 5 night hawks. at Sullivan photo 720727-10 of Bar Harbor or Acadia National Park mts. to SW. Arrived at Campobello Island at 7:00 P.M. at mileage 55100 or 151 miles today. At beach measured tide

as

Tide moves up grade at 15' per 30 minutes from low tide to top of last wet sands is 200 feet and then 60' beyond to top of ridge. Waters pass over this

ridge in storms.

Campobello Provincial Park, New Brunswick, Canada

July 28, 1972

min temp last night 52°F. This A.M. photographed no.

720728-1 daisylike flower on sands near conifers

720728-2 Trailer

720728-3 spongy beach to E where above tide transect was made. Rock extensively covered with lichen. The two black guillemot fed about 200' out from shore and then to W.

Birds in area are: Canada jay, crow, black guillemot, barn swallow, song sparrow, robin, Herring gull.
