 Provincial Park). 2 grackles. 450 crow. 453 E. Kingbird.
 455 Paffy Lake, ducks. Photo 720811-1 of a road injured
Thamnophis _____ 24 inches in length. Longlac
 at 58475 at 7:30 P.M. Camped W of here at 58484 at 9:05
 P.M. Covered 387 miles today. Camp in clearing of forest off road.

9 mi. W Longlac, Ontario Province, Canada

Aug 12, 1972

Tamiasciurus, Chymunk, 5 Canada jay in area. Also moose and
 bear tracks. Min temp last night 49°F. Will keep complete
 records to Thunder Bay. 58487 Canada jay. 488 small bird.
 492 kingfisher. 493 LMF Ranger Station 494 Ring-billed gull
 and common tern. at Keogamisis Lake. 495
 Mc Cleod Provincial Park. Prior to this area there has been
 no fall colors but here the yellows are just noticeable but
 uncommon, just a few isolated trees, mostly aspen trees.
