

Suggestions for Camp.

Use weather proof nylon on excavation site markers and replace when needed.

Have scout get involved with activity at Camp.

Form archaeological protocol for digging (no pot-hunting)

Don't touch pictographs

Limit speed to 12 miles per hour on all roads to reduce ^{dust,} upkeep, and improve quality of camp value.

Decrease danger on ledges

Keep scouts on established trails (can be natural trails)

Reduce overall car traffic.

Stratigraphy in area:

Willwood - Tertiary

Chugwater - Triassic

Phosphoria }
Dunwoody } - Permian

Tensleep (ss)
