R.R. tracks. 00.3 2 starling. 10.3 2 starling. 10.4 Delaware River bridge, water frozen 01.7 sng sparrow. 02.1 rough leg. 02.4 2 starling. 02.9 Sparrow hawk. 03.3 highway 24. 04.6 Thompsonville Rd. 04.9 bobwhite, bluejay. 05.4 now N up hill 06.3 overlook at 8:45 A.M. Can see 300 mallards in middle of lake, 6 goldeneye along dam and no gulls. water reflective along N side dam and beyond only slightly rippled. Visibility to Big Slough bridge. At 8:47 flock of blue + snow geese arrived from S and cleared dam by about 100 feet and alighted about 7/10 mi to N in lake. One circle and then alighted toward the dam and in the direction of the very light breeze. Continuous calling by geese, especially on alighting but in 2 minutes after alighting the calls were 2 or 3 per second. Kept circular and compact. Those that overshot the landing by 50 or so feet are now swimming back toward main flock. and these are mainly blues (12) which were the last to alight. The census of geese are as follows: (B = blues, S = snows)
