

1/10 mi. E Cameron Pass, 10320 ft., Larimer Co., Colorado.

July 18, 1975

min temp 39°F last night.
Temp 67°F at 2:35 P.M.

From 50 traps (second night in same position) from W exposure of Engelmann spruce:

750718-1 *Eutamias* {168}-[56]-30-15-45gms. ♂ testes 5mm
750718-2 " 196-88-30-15-43gms. ♂ testes 6mm

2/10 mi NW Cameron Pass, 10280 ft., Larimer Co., Colorado

July 18, 1975

From 50 traps set among Engelmann spruce (10 in willows bordering spruce) among down logs and bordered by damp to saturated meadows:

750718-3 *Peromyscus maniculatus* 155-68-20-17-22gms ♂ testes 10mm
750718-4 " 162-71-20-17-23gms ♀ 3x2 plac. scars
750718-5 *Zapus princeps* 245-145-33-15-29gms. ♀ 3x3 emb. 8mm
750718-6 " " 224-131-31-15-22gms ♀ 2x4 emb 3mm
750718-7 *Clethrionomys gapperi* 145-45-18-14-31gms 1x6 emb 14mm
750718-8 " " 146-46-19-14-29gms ♂ testes 12mm
750718-9 *Eutamias* 197-87-30-16-48gms ♀ 2x2 plac scars
750718-10 " 199-86-30-15-39gms. ♂ testes 7mm
750718-11 *Citellus lateralis* 270-88-42-20-163gms.

Specimens 750718-1 and 750718-2 from traps left set during the day of the 17th. Nos 750718-3 to 750718-11 from set of last night.

The *Zapus* from willows in open field. Two deer tracks in area of above traps measured 68 and 75mm respectively. Noted 2 western flycatchers? preparing to enter area of cut bank last evening at beginning of dimming lights. Also noted an Audubon warbler.

In an open stretch at base of slope, probably cause of avalanche, noted several large trees blown down with winds from the NW

↑
N

Thomomys uncommon at the divide area.

at 2:30 took photo 750718-11 of Annette and an old outdoor church just NW of divide.

Left camp at mileage 3636.2 for Walden at 3:00 P.M.

From road between camp and canyon to S in the Hokhu Peak area made photo 750718-12 of Annette and trailer. At 3638 road kill golden-mantled ground squirrel and another investigating the road-kill. Pavement at 3640.0. Continued to Walden
