

1/2 mi ^W of W end Hourglass Lake 10560 ft. Albany Co., Wyoming
 July 21, 1975 min temp 34°F

From trapline of 50 traps set in willow of wet meadows caught:

<u>750721-1</u>	<i>Microtus montanus</i>	153-39-19-12-41 gms ♂	Testes 12 mm
<u>750721-2</u>	" "	155-43-19-10-40 gms ♀	testis 11 mm
<u>750721-3</u>	<i>Eutamias minimus</i>	194-85-30-15-42 gms ♂	testes 5 mm
<u>750721-4</u>	" "	199-86-30-15-50 gms. ♀	3x1 plac. scars. lactating

From 50 traps in Engelmann spruce at the following locality:

1/10 mi E of outlet Libby Lake, 10560 ft. Albany Co., Wyoming.

July 21, 1975

<u>750721-5</u>	<i>Clethrionomys gapperi</i>	140-41-18-15-24 gms ♂	testes 12 mm
<u>750721-6</u>	" "	148-45-19-15-24 gms ♀	7x1 emb 3 mm
<u>750721-7</u>	" "	151-48-19-15-25 gms ♂	testes 11 mm
<u>750721-8</u>	" "	139-42-19-15-23 gms ♀	4x3 emb. 5 mm
<u>750721-9</u>	<i>Peromyscus maniculatus</i>	162-73-21-17-19 gms ♂	testes 10 mm
<u>750721-10</u>	" "	154-65-21-17-22 gms ♂	testes 10 mm
<u>750721-11</u>	<i>Eutamias</i>	198-88-30-15-50 gms ♀	ut. vase but small, mammary glands large
<u>750721-12</u>	" "	[176]-[67]-31-15-46 gms ♀	ut. normal and white, firm mammary glands large
<u>750721-13</u>	" "	188-81-30-15-39 gms. ♂	testes 5 mm
<u>750721-14</u>	" "	197-90-30-15-45 gms ♂	testes 5 mm
<u>750721-15</u>	" "	198-89-30-15-39 gms. ♂	testes 5 mm

The above traps were collected before the direct sunshine was on this exposure at about 7:00 A.M. Prepared these specimens and recorded two photographs of camp ~~and~~ and the creek (Libby). Photo 750721-16 of ~~trapper~~ trapping area among willows with demarcation between higher willows in main area and shorter vegetation between the willows and the creek. The traps were set at edge of higher *Salix* (*Engelmann* sp.). Photo also shows snow and emulsion of Libby Creek. Not effect of W wind on trees. Photo 750721-17 of Annette & trailer at this camp. Not bridge of snow over Libby Creek. Photo 750721-18 *ibid* as above. High winds could displace trailers in this position. Bold clouds characterize the sky today. Photo 750721-19 Phlox-like flower in solid masses on disturbed slopes. Photo 750721-20 Same as above but among roots of trunk of dead Engelmann.

This afternoon set up camp 1/2 mi. E, 1 3/20 mi. S of the E end of Hourglass Lake which is E of the present camp. Set 50 traps among newly cleared Engelmann spruce and 50 traps among willows around edge of lake. These areas are on flatter sections of the area than at previous camp. Some isolated runways associated with grasses and sedges around the lake.
